

# Akram Hany Ahmed

Front-End Developer

 Email    01026458206    Portfolio    LinkedIn    GitHub    Mansoura, Egypt

## SUMMARY

---

I am a Front-End Developer with strong experience in building modern, responsive, and user-friendly web applications using React, Next.js, TypeScript, and Tailwind CSS. I have hands-on experience developing complete management systems, dashboards, authentication flows, API integration, and role-based applications. I also have a good understanding of Back-End concepts, including REST APIs, databases, authentication, and server-side development, which helps me build and understand full-stack applications effectively. I am a problem solver who enjoys researching, learning new technologies, and continuously improving my skills. I am focused, adaptable, and committed to writing clean, maintainable code and delivering high-quality projects on time.

## PROJECTS

---

### Connected

[GitHub](#) [Live Demo](#)

- Framework, Tools and Programming Languages used: Next.js, TypeScript, Tailwind CSS, JavaScript, MongoDB, Mongoose, NextAuth.js
- Technologies and Hooks: React Hooks such as useState and useEffect, NextAuth.js for authentication and session management, Mongoose for database operations, and JWT-based authentication
- Features available in the app: User registration and login, role-based access control, product and service publishing, search and filtering, post approval system, user profiles, direct contact between users, and separate dashboards for different roles including Admin, Factory, Worker, Wholesaler, Shipper, RMD, and Retailer

### Lab Management System

[GitHub](#) [Live Demo](#)

- Framework, Tools and Programming Languages used: Next.js 16, NextAuth, Tailwind CSS, TypeScript, HTML5, JavaScript
- Technologies and Hooks: useState, useEffect, async/await, React Hooks, Next.js App Router
- Features available in the app: Manage patients, employees, laboratory tests, appointments, and test results, with role-based access for Admin, Employee, and Patient users

## EXPERIENCE

---

- **Infinity tech LTD:** worked as a Front-End developer 1/1/2024 - 1/1/2025
- **Freelancer:** worked as a Full-Stack developer 1/1/2025 - NOW

## PROGRAMMING LANGUAGES, FRAMEWORKS & TOOLS

---

HTML5   CSS   Tailwind CSS   JavaScript   TypeScript   Next.js   API Dog   Zustand   Context API

React.js   Node.js   MongoDB   Clerk   Auth.js

## COURSES

---

## SKILLS

---

- **Web Applications & Systems:** Experienced in building complete web-based systems with structured dashboards, user workflows, role-based access, and organized application architecture.
- **E-commerce Applications:** Able to develop e-commerce platforms with products, categories, search and filtering, user accounts, and business workflows.
- **Routing & Navigation:** Experienced in creating dynamic and protected routes, role-based navigation, redirects, and structured page routing using Next.js.
- **Authentication & Authorization:** Able to implement registration, login, logout, sessions, JWT-based authentication, and role-based access control.
- **Backend & APIs:** Experienced in creating API routes, handling requests and responses, connecting applications to databases, and implementing CRUD operations.
- **Database Integration:** Experienced in working with MongoDB and Mongoose for storing, retrieving, updating, and managing application data.
- **Frontend Development:** Able to build responsive and interactive interfaces using React, Next.js, TypeScript, and Tailwind CSS, with reusable components and React Hooks such as useState and useEffect.
- **Full-Stack Development:** Capable of connecting frontend interfaces with backend APIs, authentication systems, databases, and business logic to build complete full-stack applications.

## EDUCATION

---

Bachelor of Arts in Geography and Geographic Information Systems, Mansoura University
