SUMMARY

I am a Front-End Developer with strong experience in building modern, responsive, and user-friendly web applications using React, Next.js, TypeScript, and Tailwind CSS. I have hands-on experience building complete management systems, dashboards, authentication flows, API integrations, and role-based applications. I also have a good understanding of back-end development concepts, including REST APIs, databases, authentication, and server-side development, which enables me to effectively build and understand full-stack applications. I am a problem solver who enjoys researching, learning new technologies, and continuously improving my skills. I am focused, adaptable, and committed to writing clean, maintainable code and delivering high-quality projects on time.

EXPERIENCE

- **Infinity Tech Ltd.:** Worked as a Front-End Developer **Jan 2024 – Jan 2025**
- **Freelancer:** Worked as a Full-Stack Developer **Jan 2025 – Present**

PROJECTS

Connected

[GitHub](#) [Live Demo](#)

- **Frameworks, Tools, and Programming Languages Used:** Next.js, TypeScript, Tailwind CSS, JavaScript, MongoDB, Mongoose, and NextAuth.js.
- **Technologies and Libraries:** React Hooks such as useState and useEffect, NextAuth.js for authentication and session management, Mongoose for database operations, and JWT-based authentication.
- **Key Features:** User registration and login, role-based access control, product and service publishing, search and filtering, post approval system, user profiles, direct contact between users, and role-specific dashboards for Admin, Factory, Worker, Wholesaler, Shipper, RMD, and Retailer roles.

Lab Management System

[GitHub](#) [Live Demo](#)

- **Frameworks, Tools, and Programming Languages Used:** Next.js 16, NextAuth.js, Tailwind CSS, TypeScript, HTML5, and JavaScript.
- **Technologies and Hooks:** React Hooks such as useState and useEffect, async/await, and the Next.js App Router.
- **Key Features:** Managing patients, employees, laboratory tests, appointments, and test results, with role-based access for Admin, Employee, and Patient users.

SKILLS

- **Web Applications & Systems:** Experienced in building complete web-based systems with structured dashboards, user workflows, role-based access, and organized application architecture.
- **E-commerce Applications:** Experienced in developing e-commerce platforms with products, categories, search and filtering, user accounts, and business workflows.

- **Routing & Navigation:** Experienced in creating dynamic and protected routes, role-based navigation, redirects, and structured page routing using Next.js.
- **Authentication & Authorization:** Experienced in implementing registration, login, logout, session management, JWT-based authentication, and role-based access control.
- **Backend & APIs:** Experienced in developing API routes, handling requests and responses, connecting applications to databases, and implementing CRUD operations.
- **Database Integration:** Experienced in working with MongoDB and Mongoose for storing, retrieving, updating, and managing application data.
- **Frontend Development:** Experienced in building responsive and interactive interfaces using React, Next.js, TypeScript, and Tailwind CSS, with reusable components and React Hooks such as useState and useEffect.
- **Full-Stack Development:** Capable of connecting frontend interfaces with backend APIs, authentication systems, databases, and business logic to build complete full-stack applications.

PROGRAMMING LANGUAGES, FRAMEWORKS & TOOLS

HTML5	CSS3	JavaScript	TypeScript	React.js	Next.js	Tailwind CSS	Zustand	Context API
Node.js	MongoDB	NextAuth.js	Clerk	Postman				

COURSES

JavaScript Bootcamp	Next.js	React.js	Node.js	Tailwind CSS	HTML5	CSS
---------------------	---------	----------	---------	--------------	-------	-----

EDUCATION

Bachelor of Arts in Geography and Geographic Information Systems, Mansoura University
